Contents of Volume 171, No. 1

NOMENCLATURE DOCUMENTS

	PAGE
Nomenclature of phosphorus-containing compounds of biochemical importance	1
The nomenclature of lipids	21
Nomenclature of multiple forms of enzymes	37

FULL PAPERS

Proteins

	PAGE
Characterization of monoferric fragments obtained by tryptic cleavage of bovine transferrin. *By* J. H. Brock, F. R. Arzabe, N. E. Richardson & E. V. Deverson	73
A simple sensitive method, applicable to small polypeptides, for the determination of proteins in polyacrylamide gels after isoelectric focusing. *By* P. L. Storring & R. J. Tiplady	79
Occurrence and characterization of stable intermediate state(s) in the unfolding of ovomucoid by guanidine hydrochloride. *By* M. A. Baig & A. Salahuddin	89
The purification and properties of the second component of human complement. *By* M. A. Kerr & R. R. Porter	99
Cytosol oestrogen receptor of lactating mammary gland. Effect of heparin on the aggregation of the receptor and interaction of the receptor with heparin–Sepharose. *By* F. Auricchio, A. Rotondi, P. Sampaolo & E. Schiavone	137
Preparation and characterization of frog muscle myosin subfragment 1 and actin. *By* M. A. Ferenczi, E. Homsher, D. R. Trentham & A. G. Weeds	155
Reaction mechanism of the magnesium ion-dependent adenosine triphosphatase of frog muscle myosin and subfragment 1. *By* M. A. Ferenczi, E. Homsher, R. M. Simmons & D. R. Trentham	165
Troponin I from human skeletal and cardiac muscles *By* P. Cummins & S. V. Perry	251

Carbohydrates

	PAGE
Self-association of proteoglycan subunits from pig laryngeal cartilage. *By* J. K. Sheehan, I. A. Nieduszynski, C. F. Phelps, H. Muir & T. E. Hardingham	109

Small Molecules

	PAGE
Glucuronic acid conjugates of bilirubin-IXα in normal bile compared with post-obstructive bile. Transformation of the 1-*O*-acylglucuronide into 2-, 3- and 4-*O*-acylglucuronides. *By* F. Compernolle, G. P. Van Hees, N. Blanckaert & K. P. M. Heirwegh	185
The fate of bilirubin-IXα glucuronide in cholestasis and during storage *in vitro*. Intramolecular rearrangement to positional isomers of glucuronic acid. *By* N. Blanckaert, F. Compernolle, P. Leroy, R. Van Houtte, J. Fevery & K. P. M. Heirwegh	203

Enzymology

	PAGE
The purification and properties of urocanase from *Pseudomonas testosteroni*. *By* A. J. Hacking, M. V. Bell & H. Hassall	41
A reappraisal of the reaction of butyryl-coenzyme A dehydrogenase with phenylmercuric acetate. Evidence that de-greening involves a reaction of the tightly bound thioester. *By* P. C. Engel & J. B. Jones	51
The cellulase of *Trichoderma koningii*. Purification and properties of some endoglucanase components with special reference to their action on cellulose when acting alone and in synergism with the cellobiohydrolase. *By* T. M. Wood & S. I. McCrae	61
Stopped-flow spectrophotometric studies on the reaction of turkey liver xanthine dehydrogenase with reducing substrates. *By* Í. Ní Fhaoláin, M. J. Hynes & M. P. Coughlan	83
Evidence for a pH-dependent irreversible formation of a stable conformation of phenacyl-α-chymotrypsin. *By* P. S. Mariano, G. I. Glover & J. R. Petersen	115

PAGE

Cyclic AMP-dependent histone-specific nucleoplasmic protein kinase from rat liver.
By J. R. Neumann, A. R. O'Meara & R. L. Herrmann 123

Renal inactivation of substance P in the rat.
By P. E. Ward & A. R. Johnson 143

Studies on cathepsin B in human articular cartilage.
By M. T. Bayliss & S. Y. Ali 149

Pressure relaxation of the equilibrium of the pig heart lactate dehydrogenase system.
By M. J. Hardman, J. H. Coates & H. Gutfreund 215

Pyruvate-to-ethanol pathways in *Entamoeba histolytica*.
By H.-S. Lo & R. E. Reeves 225

PAGE

DNA polymerases from *Chlamydomonas reinhardii*. Purification and properties.
By C. A. Ross & W. J. Harris 231

DNA polymerases from *Chlamydomonas reinhardii*. Further characterization, action of inhibitors and associated nuclease activities.
By C. A. Ross & W. J. Harris 241

Intermolecular Organization

Maximizing the purification of the activated glucocorticoid receptor by DNA–cellulose chromatography.
By H. J. Eisen & W. H. Glinsmann 177

RAPID PAPERS

PAGE

Proteins

Crystallization of human oxyhaemoglobin from poly(ethylene glycol) solutions.
By M. J. Grabowski, A. M. Brzozowski, Z. S. Derewenda, T. Skarżyński, M. Cygler, A. Stępień & A. E. Derewenda 277

Nucleic Acids

Conformational variation in superhelical deoxyribonucleic acid.
By A. M. Campbell 281

Enzymology

Problems encountered in measuring activity of phosphatidate phosphohydrolase.
By R. G. Sturton & D. N. Brindley 263

PAGE

Kinetics of tetrahydrobiopterin synthesis by rabbit brain dihydrofolate reductase
By H. T. Abelson, R. Spector, C. Gorka & M. Fosburg 267

A study of the role of the reactive thiol group of rabbit muscle creatine kinase with a chromophoric reporter group.
By M. A. Keighren & N. C. Price 269

The intracellular location of pyruvate carboxylase, citrate synthase and 3-hydroxyacyl-CoA dehydrogenase in lactating rat mammary gland.
By D. J. Taylor, B. Crabtree & G. H. Smith 273

A simple high-yield procedure for isolation of human urinary kallikreins.
By N. B. Oza & J. W. Ryan 285

Contents of Volume 171, No. 2

FULL PAPERS

PAGE

Proteins

Incorporation and release of inorganic phosphate in horse spleen ferritin.
By A. Treffry & P. M. Harrison 313

PAGE

Iron-binding fragments from the *N*-terminal and *C*-terminal regions of human lactoferrin.
By J.-M. Bluard-Deconinck, J. Williams, R. W. Evans, J. Van Snick, P. A. Osinski & P. L. Masson 321

334AA 013 C
78 2 1 2191
QUALITY CONTROL MARK

CONTENTS

PAGE

Haemichrome formation from haemoglobin subunits by hydrogen peroxide.
By A. Tomoda, K. Sugimoto, M. Suhara, M. Takeshita & Y. Yoneyama 329

Sequence of the full-length immunoglobulin κ-chain of mouse myeloma MPC 11.
By G. P. Smith 337

Isolation and characterization of phytoferritin from pea (*Pisum sativum*) and lentil (*Lens esculenta*).
By R. R. Crichton, Y. Ponce-Ortiz, M. H. J. Koch, R. Parfait & H. B. Stuhrmann 349

Boundary refinement of the lysozyme antigenic site around the disulphide bond 6–127 (site 1) by 'surface-simulation' synthesis.
By M. Z. Atassi & C.-L. Lee 419

The precise and entire antigenic structure of native lysozyme.
By M. Z. Atassi & C.-L. Lee 429

Lysine residue 240 of human serum albumin is involved in high-affinity binding of bilirubin.
By C. Jacobsen 453

Studies of an acid-induced species of purple membrane from *Halobacterium halobium*.
By T. A. Moore, M. E. Edgerton, G. Parr, C. Greenwood & R. N. Perham 469

Nucleic Acids

Biochemical aspects of cardiac muscle differentiation. Determination of deoxyribonucleic acid template availability and 3′-hydroxyl termini in nuclei and chromatin by using exogenous deoxyribonucleic acid polymerases.
By W. C. Claycomb 289

Quantitative analysis of rat liver nucleolar and nucleoplasmic ribosomal ribonucleic acids.
By M. D. Dabeva, K. P. Dudov, A. A. Hadjiolov & A. S. Stoykova 367

Processing and migration of ribosomal ribonucleic acids in the nucleolus and nucleoplasm of rat liver nuclei.
By K. P. Dudov, M. D. Dabeva, A. A. Hadjiolov & B. N. Todorov 375

Carbohydrates

Location of *O*-methyl sugars in antigenic (lipo-)polysaccharides of photosynthetic bacteria and cyanobacteria.
By R. N. Tharanathan, H. Mayer & J. Weckesser 403

PAGE

Small Molecules

Bile salts of the green turtle *Chelonia mydas* (L.).
By G. A. D. Haslewood, S. Ikawa, L. Tökés & D. Wong 409

Enzymology

Deacylation of acetyl-coenzyme A and acetylcarnitine by liver preparations.
By A. M. Snoswell & P. K. Tubbs 299

The heterogeneity of the lipoprotein lipase of rat epididymal adipose tissue.
By P. Ashby, A. M. Tolson & D. S. Robinson 305

Ultraviolet difference-spectroscopic studies of substrate and inhibitor binding to *Lactobacillus casei* dihydrofolate reductase.
By K. Hood & G. C. K. Roberts 357

Characterization of the papain active centre by using two-protonic-state electrophiles as reactivity probes. Evidence for nucleophilic reactivity in the un-interrupted cysteine-25–histidine-159 interactive system.
By M. Shipton & K. Brocklehurst 385

Troponin-like proteins from muscles of the scallop, *Aequipecten irradians*.
By A. Goldberg & W. Lehman 413

Purification of plasminogen activators from human seminal plasma.
By D. Propping, L. J. D. Zaneveld, P. F. Tauber & G. F. B. Schumacher 435

The heterogeneity of cytoplasmic deoxyribonucleic acid polymerase from *Physarum polycephalum*.
By K. S. Zänker & W. Schiebel 445

Resolution of the methane mono-oxygenase of *Methylococcus capsulatus* (Bath) into three components. Purification and properties of component C, a flavoprotein.
By J. Colby & H. Dalton 461

Comparison of the kinetic properties of ribulose bisphosphate carboxylase in chloroplast extracts of spinach, sunflower and four other reductive pentose phosphate-pathway species.
By M. E. Delaney & D. A. Walker 477

RAPID PAPERS

PAGE

Proteins

Criteria to recognize the structure and micropolarity of pyridoxal 5′-phosphate-binding sites in proteins.
By M. Cortijo, J. S. Jimenez & J. Llor 497

Lipids

The preparation of liposomes bearing human (HLA) transplantation antigens.
By M. J. Turner & A. R. Sanderson 505

Enzymology

Simplified preparation of a phosphatase inhibitor and further studies of its action.
By S. P. Coburn & W. E. Schaltenbrand 485

PAGE

The influence of the type of sulphate bond and degree of sulphation of glycosaminoglycans on their interaction with lysosomal enzymes.
By J. L. Avila 489

Neutral metallo-proteinases of rabbit bone. Separation in latent forms of distinct enzymes that when activated degrade collagen, gelatin and proteoglycans.
By A. Sellers, J. J. Reynolds & M. C. Meikle 493

Co-operativity and the methods of plotting binding and steady-state kinetic data.
By E. P. Whitehead 501

I-cell disease. A hypothesis for the structure of the carbohydrate recognition site on β-D-*N*-acetylhexosaminidase.
By G. D. Vladutiu 509

Molecular Aspects
Contents of Volume 171, No. 3, 1978
FULL PAPERS

PAGE

Proteins

Isolation and hydroxylysine glycoside content of some cyanogen bromide-cleaved fragments of collagen from bovine corneal stroma.
By N. A. Panjwani & J. J. Harding 687

Chymotryptic and tryptic peptides of fragment α1-CB3 from bovine corneal collagen. Pinpointing the sites of hexose attachment.
By N. A. Panjwani & J. J. Harding 697

Oxygen-binding characteristics of three extracellular haemoglobins of *Artemia salina*.
By J. D'Hondt, L. Moens, J. Heip, A. D'Hondt & M. Kondo 705

Determination of binding affinities of retinoids to retinoic acid-binding protein and serum albumin.
By B. P. Sani, B. C. Titus & C. K. Banerjee 711

Interaction of urokinase with α_2-macroglobulin investigated by isoelectric focusing. Evidence for non-specific dissociable binding.
By E. Vahtera & U. Hamberg 767

PAGE

Nucleic Acids

The effects of Acridine Orange on deoxyribonucleic acid in *Escherichia coli*.
By G. R. Barker & N. Hardman 567

Alkylation of deoxyribonucleic acid by carcinogens dimethyl sulphate, ethyl methanesulphonate, *N*-ethyl-*N*-nitrosourea and *N*-methyl-*N*-nitrosourea. Relative reactivity of the phosphodiester site thymidylyl(3′-5′)thymidine.
By D. H. Swenson & P. D. Lawley 575

A simple procedure for the isolation and purification of protamine messenger ribonucleic acid from trout testis.
By L. Gedamu, K. Iatrou & G. H. Dixon 589

Chemical modification as a probe of conformational changes in transfer ribonucleic acid on aminoacylation.
By M. Lowdon & J. P. Goddard 601

Effect of the protein-synthesis-initiation inhibitor 2-(4-methyl-2,6-dinitroanilino)-*N*-methylpropionamide on ribonucleic acid synthesis in radish seedlings.
By L. Aspart, R. Cooke, M. Delseny & Y. Guitton 607

PAGE

The pseudouridine contents of the ribosomal ribonucleic acids of three vertebrate species. Numerical correspondence between pseudouridine residues and 2′-*O*-methyl groups is not always conserved.
By D. G. Hughes & B. E. H. Maden 781

Lipids

Surface behaviour of gangliosides and related glycosphingolipids.
By B. Maggio, F. A. Cumar & R. Caputto 559

Carbohydrates

Isolation and structural characterization of alkali-labile oligosaccharides from bovine milk-fat-globule membrane.
By G. H. Farrar & R. Harrison 549

Properties of potato lectin and the nature of its glycoprotein linkages.
By A. K. Allen, N. N. Desai, A. Neuberger & J. M. Creeth 665

A comparative study of the proteoglycan of growth cartilage of normal and rachitic chicks.
By I. R. Dickson & P. J. Roughly 675

Enzymology

Electron-paramagnetic-resonance studies of the mechanism of leaf nitrite reductase. Signals from the iron–sulphur centre and haem under turnover conditions.
By R. Cammack, D. P. Hucklesby & E. J. Hewitt 519

Steady-state and pre-steady-state kinetic studies on mitochondrial sheep liver aldehyde dehydrogenase. A comparison with the cytoplasmic enzyme.
By A. K. H. MacGibbon, L. F. Blackwell & P. D. Buckley 527

Kinetic studies on the esterase activity of cytoplasmic sheep liver aldehyde dehydrogenase.
By A. K. H. MacGibbon, S. J. Haylock, P. D. Buckley & L. F. Blackwell 533

The proton exchange of the *pro-S* hydrogen atom at C-1 in dihydroxyacetone phosphate and D-fructose 1,6-bisphosphate catalysed by class-I and class-II aldolases.
By A. Galdes & H. A. O. Hill 539

Affinity chromatography of bacterial lactate dehydrogenases.
By N. Kelly, M. Delaney & P. O'Carra 543

PAGE

Inhibition by ethanol, acetaldehyde and trifluoroethanol of reactions catalysed by yeast and horse liver alcohol dehydrogenases.
By C. J. Dickenson & F. M. Dickinson 613

Estimation of rate dissociation constants involving ternary complexes in reactions catalysed by yeast alcohol dehydrogenase.
By F. M. Dickinson & C. J. Dickenson 629

Electron-paramagnetic-resonance studies on nitrate reductase from *Escherichia coli* K12.
By S. P. Vincent & R. C. Bray 639

Electron-magnetic-resonance spectroscopy of complexes of xanthine oxidase with xanthine and uric acid.
By R. C. Bray, M. J. Barber & D. J. Lowe 653

Separation of oestrone UDP-glucuronyltransferase and *p*-nitrophenol UDP-glucuronyltransferase activities.
By R. H. Tukey, R. E. Billings & T. R. Tephly 659

Kinetic studies with the use of proton-magnetic-resonance spectroscopy of the specific α-deuteration of amino acids by *Escherichia coli* aspartate aminotransferase.
By E. Gout, S. Chesne, C. G. Beguin & J. Pelmont 719

Substrate, metal and template effects on inhibition of bacteriophage-Qβ ribonucleic acid polymerase by ortho- and pyro-phosphate.
By R. R. Brookes & J. A. Anderson 725

Equilibrium binding of coenzymes and substrates to nicotinamide–adenine dinucleotide phosphate-linked isocitrate dehydrogenase from bovine heart mitochondria.
By C. H. Reynolds, P. W. Kuchel & K. Dalziel 733

Transient kinetics of nicotinamide–adenine dinucleotide phosphate-linked isocitrate dehyrogenase from bovine heart mitochondria.
By K. Dalziel, N. McFerran, B. Matthews & C. H. Reynolds 743

Partial purification and properties of branched-chain 2-oxo acid dehydrogenase of ox liver.
By P. J. Parker & P. J. Randle 751

The specificity of cathepsin B. Hydrolysis of glucagon at the *C*-terminus by a peptidyldipeptidase mechanism.
By N. N. Aronson, Jr. & A. J. Barrett 759

 DOES NOT CIRCULATE

PAGE

The reaction of amino-oxyacetate with pyridoxal phosphate-dependent enzymes.
By R. A. John, A. Charteris & L. J. Fowler 771

Low-temperature kinetics of the reaction of oxygen and solubilized cytochrome oxidase.
By B. Chance, C. Saronio, J. S. Leigh, Jr., W. J. Ingledew & T. E. King 787

Effect of different compounds on 1-aspartamido-β-*N*-acetylglucosamine amidohydrolase from human liver.
By B. Dugal 799

Purification and some properties of an alkaline proteinase from rat skeletal muscle.
By B. Dahlmann & H. Reinauer 803

PAGE

Intermolecular Organization

Cross-linking of erythrocyte membrane proteins by periodate and intramembrane particle distribution.
By C. G. Gahmberg, I. Virtanen & J. Wartiovaara 683

General Methods

What happens when data are fitted to the wrong equation?
By K. J. Ellis & R. G. Duggleby 513

Electron paramagnetic resonance in biochemistry. Computer simulation of spectra from frozen aqueous samples.
By D. J. Lowe 649

RAPID PAPERS

PAGE

Proteins

The interaction of C-protein with heavy meromyosin and subfragment-2.
By R. Starr & G. Offer 813

Enzymology

A calcium ion-dependent adenosine triphosphate pyrophosphohydrolase in plasma membrane from rat liver. Demonstration that the adenosine triphosphate analogues adenosine 5′[$\beta\gamma$-imido]triphosphate and adenosine 5′-[$\beta\gamma$-methylene]triphosphate are substrates for the enzyme.
By H. Flodgaard & C. Torp-Pedersen 817

PAGE

Phospholipid content and activity of pure uridine diphosphate–glucuronyltransferase from rat liver.
By B. Burchell & T. Hallinan 821
